## Notes

For the safety use of products, please read the following instructions regarding the installation, use and maintenance carefully.

- . Please read the product safety and operating instructions carefully before the product is operated.
  - . Please keep the safety and operating instructions for future reference.
  - . Please pay strict attention to the warnings and implement the products according to the operating instructions closely.
  - . All operating instructions should be strictly enforced.
1. Please use the power cord recommended by manufacturer.
  2. Please do not place heavy objects on the power cord.
  3. Please do not expose the monitors to rain, humid, dusty places.
  4. Please do not place vessels with liquid (such as cups, beverage bottles) on the monitor.
  5. Please do not place this product in high heat places.
  6. Please make sure the earth terminal is good in order to avoid electric shock.
  7. Please do not open the back cover to avoid electric shock. Please contact professionals for service need.
  8. If there is no image or sound, please unplug the power cord from the AC outlet immediately. Please consult professionals if there still have problems after examining carefully.
  9. Do not place this product at unstable places such as cars, shelves or tables, as it is easy to make the product falling down, may cause severely hurt to children and adults and also damage to the product.
  10. Please do not touch the power plug with wet hands, as it will cause electric shock.
  11. Please do not expose the LCD panel in direct sunlight for a long time, it will result in damage or aging of the LCD panel.
  12. Please display this product at a suitable temperature and humidity place.
  13. Please do not spray any liquid things and/or add any objects into the monitor, it might

cause voltage instability and short-circuit, also can easily cause fires and blackouts.

14. If do not use the device for a long time, please unplug the power cord from the AC outlet.

15. Please keep not less than 5cm space around the vents while using the monitor, in order to obtain good heat dissipation effect.

## **Security**

### **Screen Maintenance**

Please follow the below guidelines carefully to prevent discoloration, stains and scratches on the screen:

- Avoid striking the screen with any object.
- Do not wipe the screen hard.
- Do not wipe the screen with solvents such as alcohol, thinner or gasoline.
- Do not spray detergent or other cleaners on the monitor or LCD panel, as it may cause fault because of water droplets into the monitor.
- Do not write on the screen.
- Do not paste or stick any viscous markers on the screen.

Screen may be cleaned by gently wiping with lint free cloth to remove dust. For the more difficult cleaning, use lint free cloth that has been very lightly dampened with detergent, then dry any excess moisture from the monitor or LCD panel immediately to prevent damage.

### **Cabinet Maintenance**

Please follow the guidelines below to prevent potential damage.

- Do not wipe the cabinet with solvents such as alcohol, thinner or gasoline.
- Do not use any pesticides and/or other volatile substances.
- Do not allow prolonged contact with rubber or plastic.
- Do not wipe the cabinet hard. Use a soft, lint free cloth to clean. If the cabinet cleaning is more difficult, use lint free cloth that has been very lightly dampened with detergent and then dry it to wipe.

## Installation

- Keep adequate air circulation to prevent device internal overheating. Please do not place the product on the surface of some certain objects (such as blankets, carpets, etc.), as these objects may block the vents.
- Please keep the device away from heat generating sources, such as radiator, heaters and air duct, also keep it away from much dust or mechanical vibration place.

## Rack mount Installation

- For rack mount installation, please keep 1U space from both top and bottom to make sure adequate air circulation, or install an external electric fan. Please follow the instructions and install with the rack mounts provided by manufacturer.

## Transportation

- This monitor is precise equipment and need professional packing materials to transport. So do not to use packing materials provided by suppliers except KONVISION or its authorized packing material suppliers.

**When the following situations occur, please turn off the power, do not insert the plug and contact a professional service staff to deal with timely.**

- A. This product smells smoke and off-flavor.
- B. When this product displays abnormal operating conditions, such as there is no picture or sound.
- C. When any liquid is splashed into the product or product dropped.
- D. When the product soaked or fall into the water.
- E. When the product has been damaged or other damage circumstances.
- F. When the power cord or plug is damaged.

**The following does not belong to failures:**

1. If the static image displayed too long, it will have residual image, which should be attributed to the characteristics of LCD display but not a failure. Residual image will disappear automatically after a period of time.
2. If this device used in a cold environment, the screen may appear residual image. This is not a product failure, when the monitor temperature changes, screen will return to normal conditions.
3. LCD screen may appear tiny spots (red, blue or green), this is not a fault, LCD screens are manufactured with high precision technology, and a small number of pixels may not be able to show intermittent.
4. Screen and cabinet will become warm gradually during operating.

**Features****High Brightness LCD Panel**

- High brightness, high contrast, high-speed response and wide viewing angle technology makes the monitor can be used under variety of lighting conditions.

**High Brightness Tally Indicator**

- The tally function via GPT or LAN port, with two colors red and green.

**Auto-detection of all color system (PAL, NTSC, SECAM)**

- This unit detects the color system automatically.

**3D Video Decoder**

- Process 3D decoding on VIDEO signals, to realize better reduce cross color.

**Motion-Adaptive Interlace to Progressive**

- It converts interlaced video to progressive video by motion detection, reduce the serrated image

**10BIT Signal Processing**

- Signal input, signal processing and image output are 10bit data processing, to ensure the details display of the image.

## **Support Multiformat SDI Signals**

- The SDI interface supports SD-SDI, HD-SDI, dual link HD-SDI and 3G SDI inputs.

## **SDI Input**

- Support multi-format SDI input, SD-SDI, HD-SDI, 3G SDI
- Support SMPTE425M-A/B 4:4:4 signals.

## **HDMI/DVI/VGA Input**

- HDMI signal can be input via HDMI to DVI-I converter through DVI connector, DVI signal can be input through DVI connector, VGA signal can be input via VGA to DVI-I Converter through DVI connector.

## **Signal Source Loop Through**

- Signal that linked to the input connector will be enlarged and linked to output connector. SDI reclock loop out ensure the signal without enervation.

## **PIP/PBP**

- Two SDI inputs signals display simultaneously under PIP (picture in picture) and PBP (picture by picture) mode. One SDI input signal can be also displayed with another signal of VIDEO, S-VIDEO, COMPONENT, HDMI simultaneously, and showing two pictures on the screen.

## **SWAP Function**

- In PIP/PBP mode, two pictures can be swapped between each other.

## **Color Temperature**

- Different color temperatures can be selected freely

## **Image Size Setting**

- The display mode is switchable among 16:9, 4:3, full screen, 1:1, and the original image proportion.

## **Marker Setting**

- Show frame borders, center marker, and safety area, etc.

## **HV Delay**

- Display horizontal and vertical board and blanking area of SDI1 input signal.

## **Color Space**

- Color space include: Rec 709、EBU、DCI P3 D65、DCI P3、Rec 2020、USER1、USER2、USER3. (This function only available to KFM-6X)

## **Color Calibration**

- This enable to calibrate imported color data of the image being measured by color analyzer. (This function only available to KFM-6X, specific instructions please contact with the dealer.)

## **Scan Mode**

- Scan mode includes Full Scan, Over Scan, Under Scan.

## **Part Zoom In**

- Zoom in any part of the picture, to watch picture details more clearly, and assist for focus.

## **Audio level meter (UV+PPM)**

- Show the audio level meter (UV+PPM) for SDI embedded audio.

## **Waveform**

- Display input signal waveform and color scope for SDI signal input monitoring. It includes luminance waveform, CbCr waveform. Luminance waveform will mark with red if over the value specified by user.

## **Focus Assist**

- Focus assist is to aid the cameraman focus on the main body by marking the sharpest edge of the image with red.

## **False Color**

- False color can Intuitively observe and calculate illumination level in the image, luminance and illumination values display mapping as luminance level, from darkest to brightness display blue, cyan, green, yellow, orange and red in turn.

## **Histogram**

- YRGB histogram displays the hue distribution of the entire image under SDI input condition, can intuitively display exposure of the image, display R, G, B 3 channels independently.

**Vector scope**

- Vector UV analysis for color bar signal input.

**Pixel Measurement**

- User can measure any pixel's specific position and RGB value, also can compare the YRGB value between any 2 pixels.

**Time code**

- Display SMPTE time code (LTC, VITC1, VITC2) under SDI1 input, it is used for identifying and synchronizing of video data streams.

**Remote Control Function**

- Available to connect to the remote terminal to operate the equipment directly, select the input signal, longitudinal mode settings and tally indicator, etc.

## Parts and Functions

### A: Front View

#### (1) Tally Indicator

Control method of Tally light

1. GPI port (control method: please look the GPI port description)
2. RS422 Port: support use TSL3.1 or TSL 4.0 protocol control the tally light

#### (2) Speaker

Stereo audio output.

**(3) Power Button and Indicator**

When the external AC power supply with electricity, the indicator light is red. Press this POWER button to power on the monitor, and the indicator light turns blue. Press this button for about 2 seconds, can turn off the monitor, the indicator light turn red.

**(4) SDI1 Button and Indicator**

Press this button to select SDI1 signal input, indicator turns blue.

**(5) SDI2 Button and Indicator**

Press this button to select SDI2 signal input, indicator turns blue.

**(6) ANALOG Button and Indicator Light**

Press this button to select input signal between YPbPr、 Video、 S-video, indicator turns blue.

**(7) HDMI/VGA Button and Indicator Light**

Press this button to select signal input among DVI/HDMI/VGA, indicator turns blue.

**(8) F1-F5 Button and Indicator Light**

F1-F5 these buttons can be used as shortcut buttons.

Press the F1-F5 buttons to select the corresponding function.\

When the set button function item is set to off in the main menu, this buttons are invalid.

F1-F5 These button functions can be set in the menu Function key options.

**(9) PIP/PBP Button**

Press this button for window layout among single, PIP, PBP mode. In PIP/PBP mode, one of the signal must be SDI1 input, the other can be any of SDI2, HDMI, VGA, Video, etc.

**(10) ZOOM/SWAP Button**

At single mode: press this button to zoom in

At PIP/PBP mode: press this button to swap 2 windows rapidly.

**(15) RIGHT/VOLUME Button**

When entering the main menu operation, press this button to select the sub menu to the right.

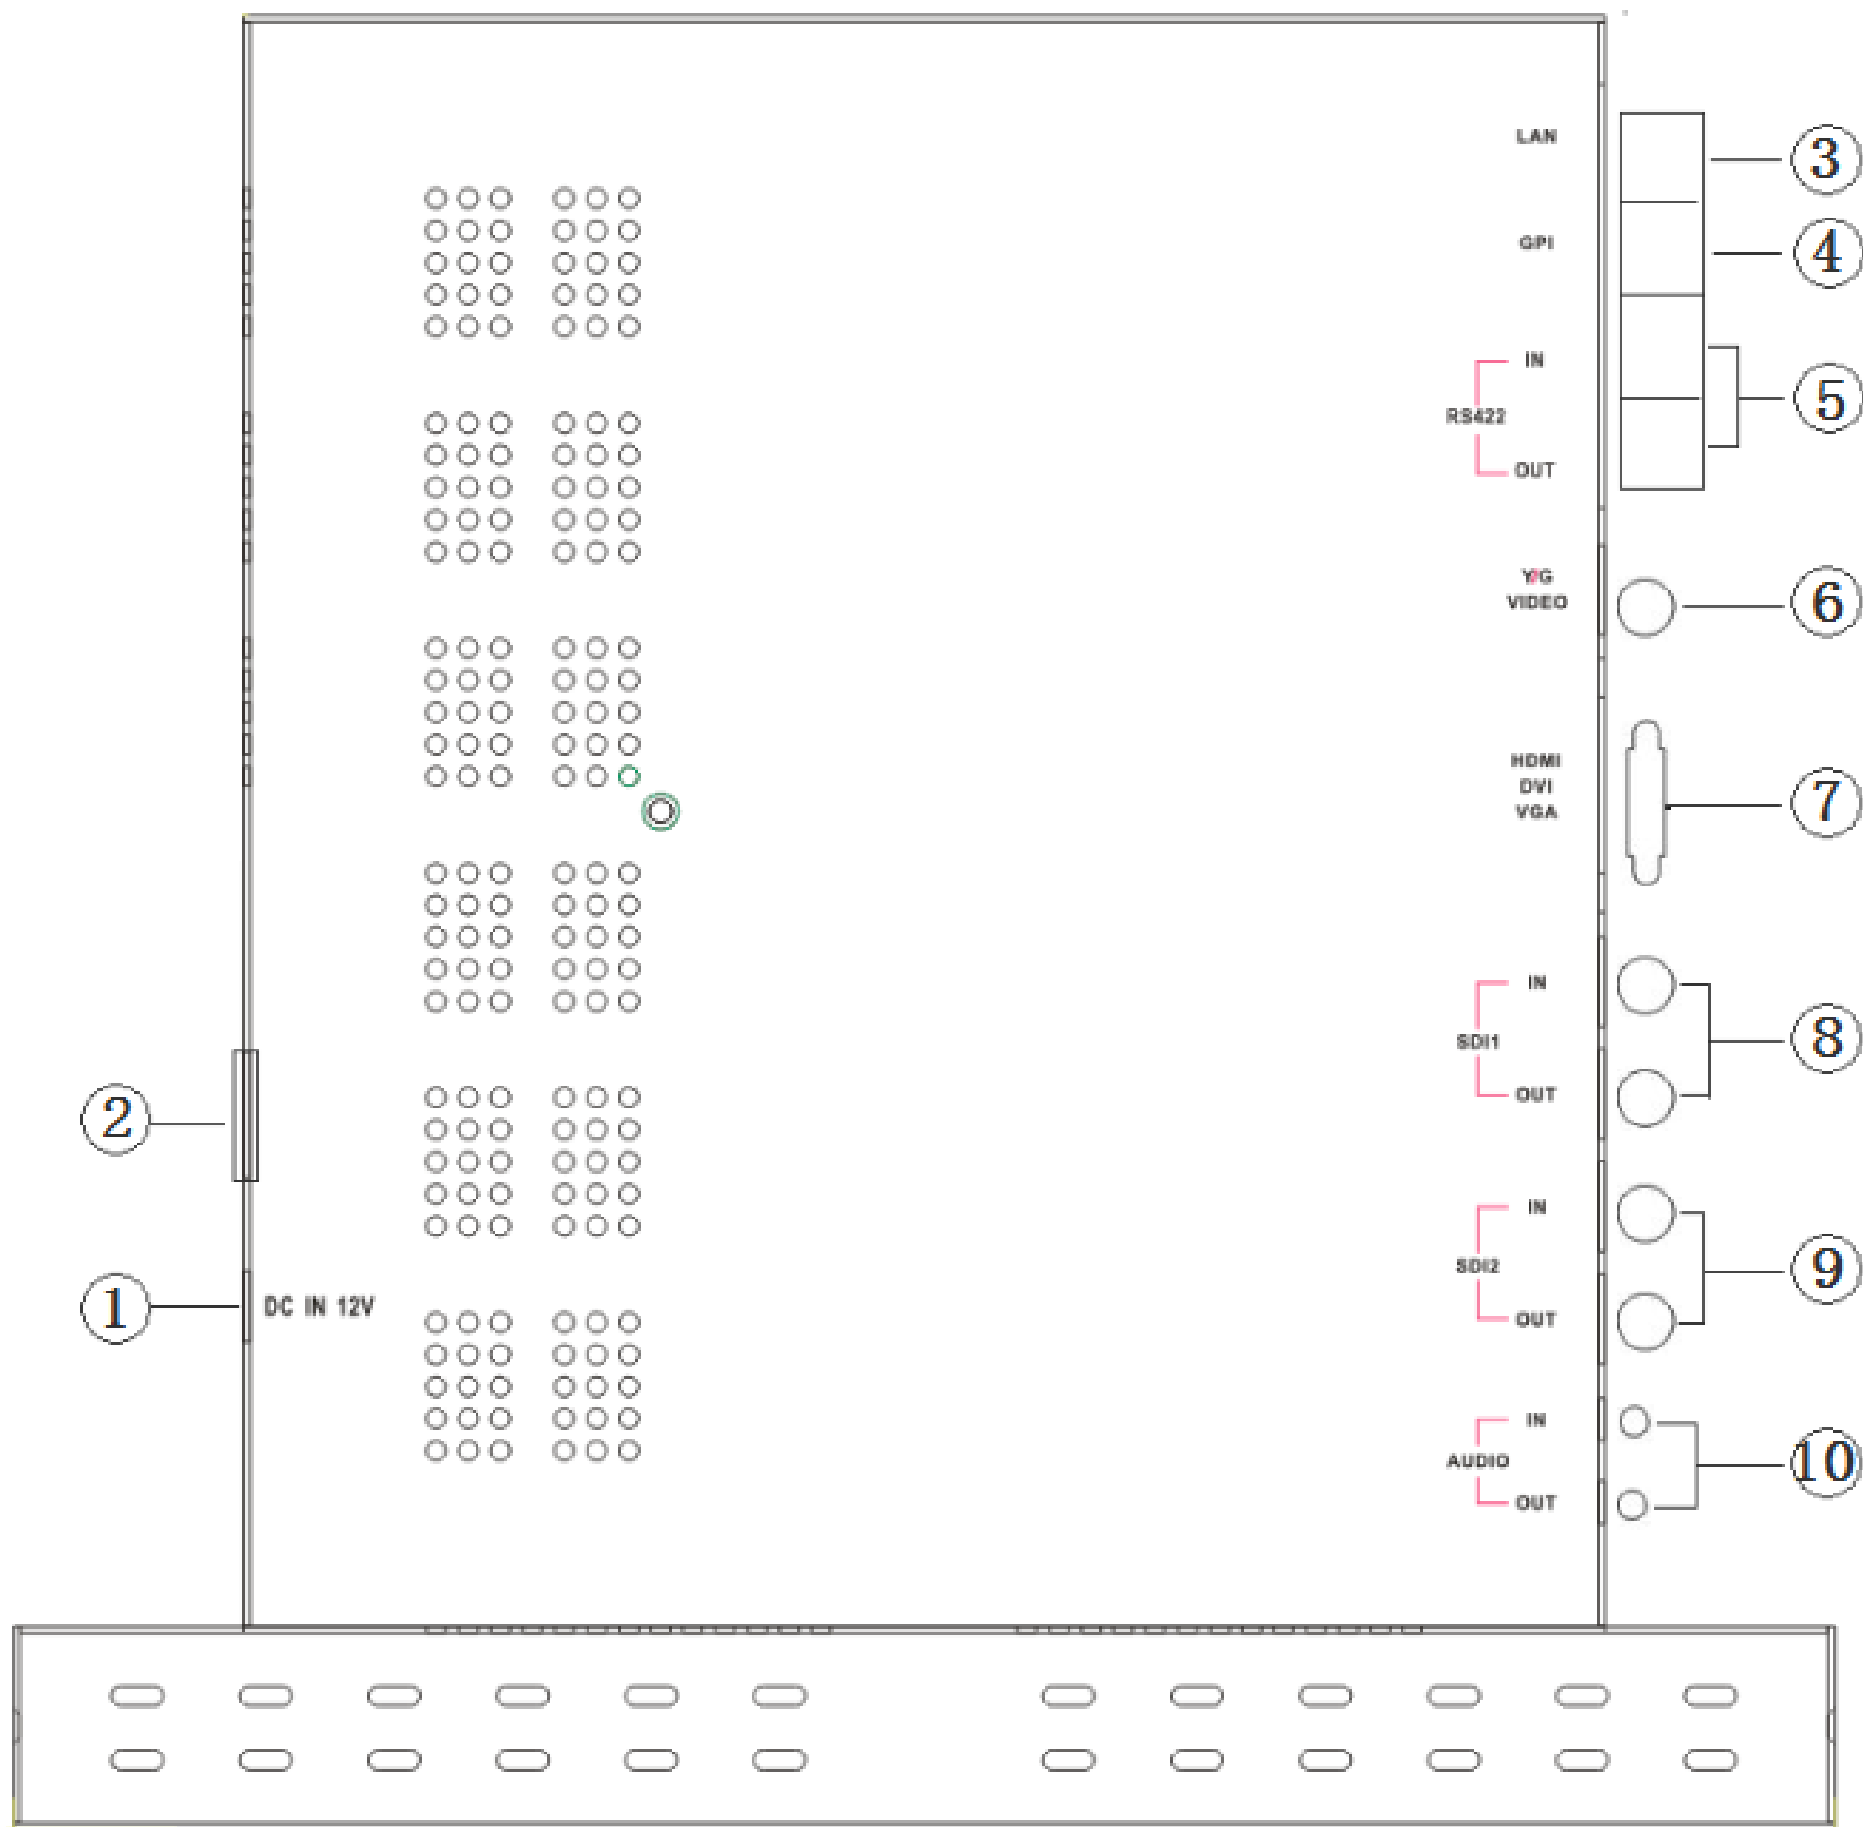

When entering the sub menu operation, press this button to adjust the parameters of the current sub menu item to the right.

When not in the menu operation, press this button to enter the volume adjustment shortcut menu.

When entering the shortcut menu, press this button to adjust the scroll bar to the right.

**B: Rear View**

KFM-1753W rear view port

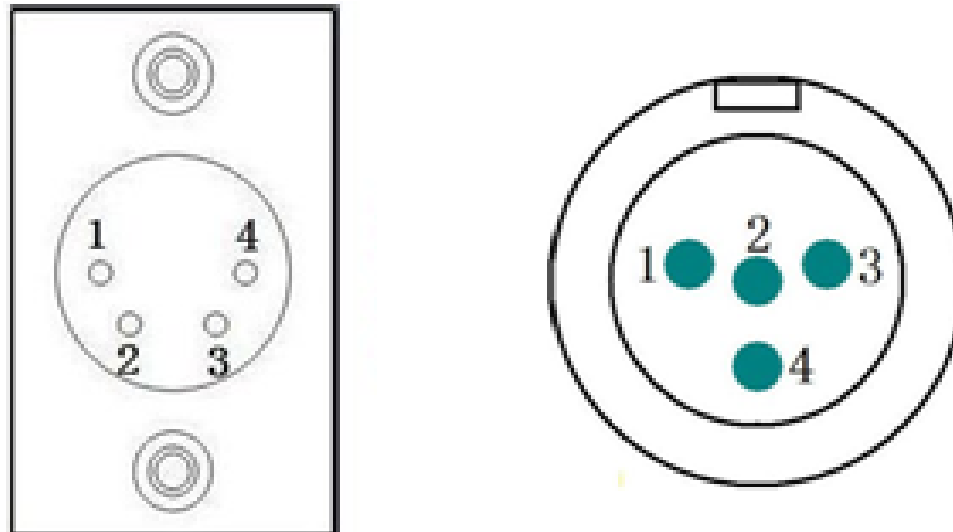

KFM-1760D rear view port

**(1) DC 12V IN**

12V DC power supply

Pin 1: GND  
Pin 2: NC (No connect)  
Pin 3: NC (No connect)  
Pin 4: 12V

The interface pins are defined as:

Pin 1: Ground

Pin 2: NC

Pin 3: NC

Pin 4: +12V

**(2) ON/OFF**

Power button

**(3) LAN**

In shortcut functions: Turn the knob to adjust the value of Brightness, Contrast and Chroma respectively.

Ethernet port for remote network control. Through this port, along with software "Konvision Device Controller", you can achieve remote controlling to the monitor easily. (remote control software & instructions please contact with the dealer)

**(4) GPI**

GPI interface:

Pin	GPI Signal	Description
1	GPI1	when connect GND, GPI1 works, GPI1 function can be set in the menu function option
2	GPI2	when connect GND, GPI2 works, GPI2 function can be set in the menu function option
3	GPI3	when connect GND, GPI3 works, GPI3 function can be set in the menu function option
4	TX	RS232-TX, for MCU program upgrade, please contact the dealer for upgrade operation. When the program is not upgraded, the suspension is not connect.
5	RX	RS232-RX, for MCU program upgrade, please contact the dealer for upgrade operation. When the program is not upgraded, the suspension is not connect.
6	GPI4	when connect GND, GPI4 works, GPI4 function can be set in the menu function option
7	NC	Not connect
8	GND	Ground

**(5) RS422(IN/OUT)**

RS422 in and out, support dynamic UMD/Tally.

Pin	RS422 IN Signal name	RS422 OUT Signal name
1	GND	GND
2	GND	GND
3	Tx-	Tx-
4	Rx+	Rx+
5	Rx-	Rx-
6	Tx+	Tx+
7	NC	NC
8	NC	NC

**(6) VIDEO**

Video signals input

**(7) HDMI/DVI/VGA**

HDMI/DVI/VGA input. DVI input, support DVI signal, HDMI signal (via HDMI-DVI convertor), and VGA signal (via VGA-DVI convertor)

**(8) SDI1(IN/OUT)**

SDI1 inputs (3G/HD/SD-SDI auto detect), SDI Reclock loop through output, without enervation.

**(9) SDI2(IN/OUT)**

SDI2 inputs (3G/HD/SD-SDI auto detect), SDI Reclock loop through output, without enervation.

**(10) AUDIO(IN/OUT)**

Audio in used for analog signal input, Audio out used for monitoring with 3.5mm earphone.

**(11) AC Faucet**

Using for AC power connect

**Menu Operation****Menu Operation:****1. MENU Button:**

Press the Menu button, the main menu will be displayed on the screen, and press the MENU button again to exit the menu.

When in sub-menu, press the MENU button to return to previous menu.

When in setting option, press the MENU button to return to exit.

**2. UP and DOWN button:**

When in the main menu or sub menu, the menu item can be selected by pressing the UP / DOWN button to select up / down functions.

**3. LETF/(RIGHT/VOLUME) button:**

When in the main menu, enter the sub menu by pressing RIGHT button.

When in the sub menu, the parameters can be adjusted by pressing the LETF / RIGH function button.

## Menu Item Description

### 1. Main menu:

The main menu contains the following items:

Main menu	Menu item
Status	1
Function Key	1
Picture	1
Image	1

F4	Press main menu Function key to set	Press main menu Function key to set
F5	Press main menu Function key to set	Press main menu Function key to set

#### Function key menu operation instruction:

Function can be set in the main menu function key. Press function key to call function key menu, press function key again to turn on / off function key function. In the function key menu, use UP / DOWN key, you can also up / down function keys. If the function key function contains multiple modes, using the LEFT / RIGHT keys, you can quickly select other functions as well. For example, the F1 function key function on the graph is the image size, while the image size function includes the original ratio, full screen, 1: 1, 16: 9 and 4: 3 modes. Using the LEFT / RIGHT key, Quickly select one of the original scale, full screen, 1: 1, 16: 9, 4: 3 settings in the key menu.

## Dual picture operation:

Continuous press PIP / PBP button, you can quickly from single-picture and dual-picture by the fast switch. In the dual picture, press the SWAP key, you can quickly exchange the left and right pictures. In the dual picture, press the WIN SEL button, you can select the picture window, at the same time, the selected window, you can also adjust the parameters alone, does not affect the other picture.

## Pixel Measurements Operating Instructions:

Under SDI1 signal only, press this key to execute the key operation: Pixel measurement.

Pixel measurement: Press the MEASURE button, this time will enter the pixel measurement function. Press LEFT, (RIGHT / VOLUME) or (UP / IMAGE ADJ), (DOWN / WIN SEL) to move the large cross mark of the pixel measurement left / right / up and down to measure the position of any one pixel R, G, B value.

Pixel measurement using two pixel contrast: Press the MEASURE button, then enter the pixel measurement function. Press LEFT, (RIGHT / VOLUME) or (UP / IMAGE ADJ), (DOWN / WIN SEL) to move the large cross to the first pixel, then press the LEFT button and the (RIGHT / VOLUME) button, Mark the first pixel, then the pixel is marked with a small cross center, then continue to press the LEFT, (RIGHT / VOLUME) or (UP / IMAGE ADJ), (DOWN / WIN SEL) Will continue to move with a large cross mark, when the large cross mark center to move to another pixel you need to contrast, you can compare the difference between the current pixel and the previous marker pixel.

Measure	Line	Sample	Y	Y%	Cb	Cr	R256	G256	B256
Current									
Ref-pos									
Dif									

Measure: Measure

Current: Current pixel

Ref-pos: Previous markup pixels

Diff: The difference between the current pixel and the previous pixel

Line: The vertical position of the pixel

Sample: The horizontal position of the pixel

Y: The Y component value of the pixel (range between 0-1023)

Y%: The percentage of the Y component of the pixel relative to the maximum, i.e.,  $(Y \text{ component value} / 256) * 100\%$

Cb: The blue chroma component of the pixel

Cr: The red color component of the pixel

R: The red component value of the pixel (range between 0-255)

G: The green component value of the pixel (range between 0-255)

B: The blue component value of the pixel (range between 0-255)

### **SDI 2K signal display Description:**

SDI in the 2K signal, the signal beyond the screen display, so look at the part of the image, you need the following operations:

1. Set the image size to 1: 1 display.
2. Press the LEFT / RIGHT button, you can move the screen left and right, this can see the over screen image.

### **Factory Reset**

This function is to reset the monitor to factory preset.

Please try to reset the monitor, when the following situations occur:

1. The monitor parameters are adjusted incorrect by user.
2. The monitor picture or sound is abnormal, and not due to hardware problem.

To do factory reset, please follow the below six steps:

Main Menu	Setup
Status	Language English
Function Key	OSD Settings =>
Picture	Format Display Auto
Image	Power Saving ON
Audio	Screen Saver ON
Marker	Factory Reset <Right>to Factory Reset
Scope	
Embedded code	
Layout	
IMD	
Alarm	
Setup	
Key Lock	

1. Press the MENU button to enter the main menu options.
2. Press the DOWN button to select the setting option.
3. Press RIGHT to select the Set Sub menu Options.
4. Press DOWN to select factory reset option.
5. Press the RIGHT button prompts, the screen will refresh, wait for 3 seconds, press the POWER button to shut down.
6. Wait for 3 seconds and then press the POWER button to boot, the monitor to restore the factory settings is completed.

## Remote Control

Remote control the monitor through Ethernet:

1. Connected with monitor via LAN, and you can achieve remote controlling by software “Konvision Device Controller”.(Network remote control software and instructions please contact with the dealer)

2. The LAN cable should be parallel connection for both two ends, for example 568B LAN cable, with pin definition:

orange-white, orange, green-white, blue, blue-white, green, brown-white, brown.

## Rack quick installation process

1. See Figure 1, when the pull-type monitor is fully folded, press the front two white screws tighten at the same time, the monitor can be fixed, so installed in the slide screen will not slide out. When the pull-up monitor is fully folded, its height H1 is 1U high and the width W is the standard 19-inch rack-mounting width, with four screw holes on each of the front and rear sides to secure the machine stand, while the L length is Tune, the shortest is 470mm, the longest is 525mm.

Figure 1

2. See Figure 2, when the pull-out monitor is pulled out horizontally, its extracted length L2 is 330mm.

Figure 2

3. See Figure 3, when the pull-out monitor stands up, its height H2 is 312mm.
